SUJAL GUPTA

+91-7011803857 | sujal17021@gmail.com | LinkedIn

Summary

Detail-oriented Computer Science student specializing in AI & ML, with skills in Python, Java, machine learning, data analysis, and full-stack development. Interested in solving real-world problems through data-driven applications and predictive models.

Skills

Programming: Python, Java **Core:** Data Structures & Algorithms, Machine Learning
Development: Full-Stack Development **Data:** Data Cleaning, EDA, Predictive Modeling, Data Visualization

Internship Experience

Intuitiva 26 June 2026 – 26 July 2026
Dashboard Development Intern (Paid) | Remote

- Completed a one-month paid internship focused on dashboard development and data analysis.
- Developed and published an online dashboard based on a user-provided dataset.
- Presented dataset information through a dashboard interface to support data exploration and insights.
- Stipend: INR 12,000.

Projects

Rainfall Prediction Model | Python September 2025 – October 2025

- Analyzed rainfall patterns across states to estimate future rainfall trends.
- Implemented Linear Regression and Multiple Regression models to analyze data and generate predictions.
- Created visualizations including histograms, bar charts, pie charts, and box plots; assessed model performance using evaluation metrics such as RMSE and precision where applicable.

Disease Prediction Model | Python, Machine Learning November 2025 – January 2026

- Built a system that analyzes user-provided symptoms to predict probable diseases using machine learning.
- Implemented Random Forest and Logistic Regression models using symptom and health-related data.
- Developed a doctor recommendation feature based on predicted diseases and user-selected locations.

Forex Trading Strategy Analyzer | Python, Machine Learning January 2026 – March 2026

- Built an automated analysis system for 28 currency pairs using technical indicators, pattern recognition, and quantitative strategies.
- Used Logistic Regression and Random Forest to classify winning and losing trades.
- Created a backtesting framework with risk management, equity tracking, drawdown analysis, and performance evaluation.
- Analyzed market trends and generated feature-importance reports to support strategy optimization.

AI Resume Analyzer | Python, Machine Learning, Full Stack January 2026 – March 2026

- Developed an AI-powered resume analysis system to extract skills and match candidates with relevant job roles.
- Applied machine learning and NLP techniques to analyze resume content and identify keywords.
- Built and deployed the application using Vercel (frontend) and Render (backend).
- Created an interface for uploading and analyzing resumes.

Education

B.Tech in Computer Science & Engineering (AI & ML) *Pursuing – 3rd Year*
GLA University, Uttar Pradesh CPI: 8.00
